

Kineo Flatpack

Fire safety and awareness: Data sheet

Fire safety and awareness - Kineo Flatpack

What's Flatpack e-learning?

Kineo Flatpacks is a breakthrough concept in e-learning. They provide you with all you need to quickly build high quality e-learning out of the box, at a fraction of the cost of bespoke e-learning.

Assemble e-learning quickly

In the **Kineo Flatpack** you'll find a complete script, professionally designed graphics, a high quality set of templates and quiz questions which can be rapidly assembled in any e-learning authoring tool.

Templates come in four colours and are easily adapted to your brand.

Tailor easily to your needs

The unique aspect of Flatpacks is that, unlike most off the shelf e-learning, you can customise messages and add or remove content to meet your organisation's needs.

Avoid costly tie-ins and per head license fees

Based on a one-off fixed fee, **Kineo Flatpacks** are one of the most cost-effective ways of delivering high quality e-learning to your staff in a range of key areas.

Kineo Flatpacks – develop high quality e-learning quickly and at low cost.

Fire safety and awareness - Kineo Flatpack

Fire safety and awareness

With new regulations coming into force in 2006, it's crucial you and your staff are aware of new responsibilities with regards to fire safety.

Kineo's **Fire safety and awareness Flatpack** gives you the platform to build a focused engaging piece of e-learning to ensure all staff can prove they know the essentials.

Once built, the Flatpack offers a **30 minute** training course which covers:

- The causes and cost of fire
- Your responsibilities as an employer under the new regulations
- Why you should remain vigilant and minimise risk
- What to do if you discover fire
- What to do if you hear a fire alarm
- What to do if you are caught in a fire situation
- A quiz to test understanding of the key requirements

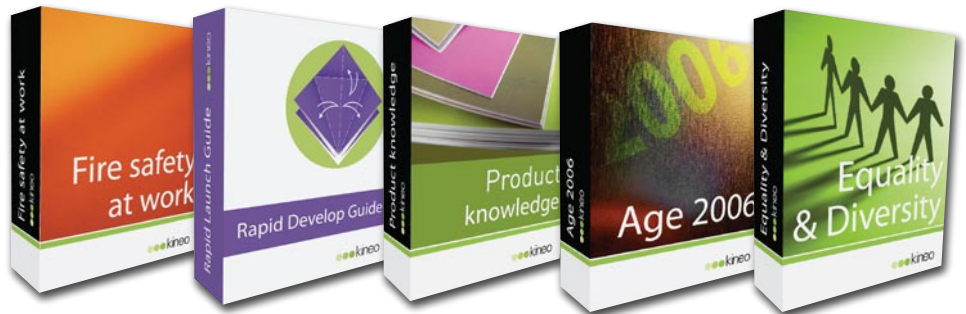

In addition, the e-learning has a whole section which can be adapted for your organisation's specific policies and procedures such as **evacuation instructions**, **fire officer information**, **building specific instructions** - to make this course truly customised to your organisation.
